### **DETAILED ACTION**

1. This is in response to the Amendment filed on 9/30/2010.
2. Claims 1-22 are currently pending in this application. Claim 14 has been amended. Note that Applicants have indicated that claim 22 has been newly added by this Amendment; however, the claim has been previously presented.
3. The previous rejection of the claims is maintained as set forth below.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dong et al. (US 2002/0136862) in view of Liu et al. (2001/0007710).

Dong discloses a decorative laminate for flooring, comprising an overlay 102, a decorative layer 101, an underlay 103, and a substrate 106 (see Fig. 1; 0051). The decorative layer comprises a carrier film of a polymer and an ink layer or a print layer (see 0026, 0030). A paper-based decorative film is impregnated with melamine (see 0031).

The layers contain reinforcing materials that include microspheres of one or more thermoplastic polymers (see 0082). The underlayer may be made similar to the overlay layer (see 0054, 0057). Thus the underlay layer may also be impregnated with melamine; and the

underlayer may also include a glass veil and a liquid coating film containing polyurethane (see 0049).

Dong fails to teach the thermoplastic polymer microspheres to be expandable.

Liu teaches expandable thermoplastic microspheres for use in a decor sheet (see abstract).

Therefore, it would have been obvious to one of ordinary skill in the art to have employed Liu's expandable thermoplastic microspheres in the decorative laminate of Dong, in order to increase abrasion resistance and decrease the wear of the press plates, while maintaining transparency of the resulting decorative laminate.

### ***Response to Arguments***

6. Applicant's arguments filed on 9/30/2010 have been fully considered but they are not persuasive.

In response to applicant's argument that the combination of references teaches away from the instant invention, the examiner recognizes that obviousness may be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988), *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992), and *KSR International Co. v. Teleflex, Inc.*, 550 U.S. 398, 82 USPQ2d 1385 (2007). In this case, Liu is used to illustrate that the use of expandable thermoplastic particles have been used in the art of decorative laminates to enhance abrasion resistance and decrease the wear of the press plates, while maintaining transparency of the decorative laminates.

***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
